The Logical Time to Order Peonies is Right Now

FOR A DESCRIPTION OF THESE PEONIES WRITE FOR OUR BOOK

Memory is too elusive a thing to be trusted! Entrust your wishes to us; write us freely any time concerning Peonies. The full benefit of a quarter century's experience with this wonderful flower is yours to command.

MAKE OUR BOOKLET YOUR GUIDE

"Peonies for Pleasure" is not a catalog but a beautiful booklet free to all who love Peonies or want to. It will appeal as much to the hobbyist as it will help the beginner. Our admiration for the Peony is akin to religion, and you'll find every word in our Peony Bible to be true.

The proper time to plant Peonies is from September 1st until the ground freezes up.

The varieties in this list are ready in September, October and November. Let us book your order now. Orders filled in strict rotation.

"PEONIES FOR PLEASURE"

SPLENDID HARDY EVERYWHERE PEONIES

"ARISTOCRAT OF FLOWERS"

THE wonderful improvements made during recent years in these old-fashioned hardy plants have brought them into renewed popularity. The gorgeous flowers, which rival the finest Roses in size, form and color, are produced in great abundance. After once being planted they require little care and attention, thrive anywhere, and are absolutely hardy even in the coldest climates; each year after planting they grow into greater value, producing more and more flowers. They are not troubled with insect pests. Try some of our fine Peonies, and see what grand flowers they are. Get it out of your head that there are only Red, White and Pink Peonies to illustrate at flowering time. People who visit our field will say, "I have Pink and White Peonies. I desire only Red ones," but when they are shown the Pink and White, they invariably exclaim, "How grand! I have none like them." There is as much difference in Peonies as there is in Roses.

We have found that divisions do not give the customer satisfaction; they have to wait too long for the plant to become established.

For this reason we are not offering any Peony this year under a one-year-size.

The one-year plant is a plant divided and reset a year before. We do not advise our customers to divide any of these one-year roots if they want bloom the first year. We find that Peonies should not be divided more than once in three years.

If you want a profusion of bloom the first year, you will find the two and three-year plants will produce more bloom according to their age.

While our strong one-year roots will all bloom for you the first year, the two-year size is the best to buy; for having become established the first year from division, the growth is more than double the second year and the prices are only about one-half more.

SPECIAL COLLECTIONS OF PEONIES

To those who do not care for the nomenclature of the Peony, we have made up several collections, and here offer them as an aid to making selections. Patrons will find these varieties embrace a wide range of color and form, and are exceptionally meritorious.

The Best Way to Grow Bulbs Indoors

PLANT HYACINTHS in sandy soil, or make the soil porous with leaf mould secured from the woods. Plant the bulb bottom down, and push the bulb tight in the soil so that the top of the bulb is even with top soil. Use old four or five-inch pots—never new pots if you can avoid it. There are shallow, wide pots made to hold three or more bulbs; they are satisfactory to plant in where only one variety is planted in a pot. Never feed the bulbs with manure—the power to flower is in the bulbs. A Hyacinth grown in water alone proves the truth of this. Give a good soaking after planting, and water once or twice a week if necessary during the time the bulb makes roots. Put the pots after planting—which should be done during September or October—in the ground, and cover the pot and all to the depth of three or four inches with soil. This is to prevent the roots from lifting the bulbs out of the pot. Or you can put them in the cellar where it is cool and dark. The idea is to have the bulbs kept cool and dark, so that the roots will start before the tops do. Cover up the ones outside with leaves or sawdust to the depth of six inches, as frost, if it reaches them, almost always results in injury to the flowers. After four weeks or so examine the roots, and see if they are down to the bottom of the pot; then bring the ones you want to flower early into a dark place where the temperature is from fifty to seventy, but keep them dark by covering them up or placing them in a dark cupboard. They can be left outdoors or in the cellar if you do not want them so early, until the sprout is as long as a man's finger. This brings them in later, but is the surest way to get fine flowers, as it is more natural than to force them quickly. When the sprouts have reached the length of a man's finger they may be exposed to the light. If brought to the light sooner the result will be that the top bells will open first, and then the flower is spoiled, for the top bells will be faded before the lower bells open. The sprouts are yellow by keeping covered, but that does not matter, as they turn green quickly when brought to the light.

Tulips and Narcissus are treated the same as Hyacinths, except that when brought in from outdoors or the cellar they can be placed in the full light at once. Instead of pots you can use grape baskets.

General Collection of Single Hyacinths

Our patrons can rely on the Hyacinths in this list as being the very best of their colors. We have tested varieties from year to year and can guarantee satisfaction in any of the following kinds. You cannot possibly go amiss in your selection of any of them. These varieties are equally good for planting outdoors or for forcing in the house in winter. **Price, 15 cents each; \$1.50 per dozen.**

ANGENIS CHRISTINA—Immaculate white; extra fine.
AVALANCHE ("White Baron Von Thuyl")—Pure white.
BARON VON THUYL—A grand shade of deep blue.
CARDINAL WISEMAN—If there is one Hyacinth that will instantly attract attention, it is this one. A beautiful silvery-rose color.
CHARLES DICKENS—A grand shade of bright blue.
ETNA—Brilliant rose striped carmine; superb.
GENERAL PELLISSIER—Deep scarlet, early, good.
GENERAL DE WET—This is known in Holland as the "Pink Grand Master." It certainly is a most wondrous beautiful bright shade of silvery-pink.
GERTRUDE—This is the freest-flowering of all the Hyacinths; often has two to four spikes of bloom; a lovely deep rosy-pink color.
GIGANTEA—Immense truss of bright rose-colored flowers.
GRAND BLANCHE—A beautiful delicate blush.
GRAND LILAS—Immense spikes and mammoth florets. Probably the largest of all Hyacinths, and is another of those delicate blues, the color that fairly entrances you. A variety that is deservedly popular everywhere. Superb.

JACQUES (Queen of the Pinks)—New, beautiful silvery-rose with satin sheen.
L'INNOCENCE—A lovely shade of creamy-white. This is one of the new varieties and takes rank in Holland among the ten best varieties. It sometimes comes with very delicate tracings of pink that set off its charms to great advantage. Superb.
MADAME VAN DER HOOP—Pure white; planted by the thousands for its superior trusses of snow-white flowers.
MARY—Dark rich royal-purple; a superior Hyacinth.
MORENO—This is said by all who have seen it to be the very best waxy pink Hyacinth yet offered. The florets are extra large, spikes solid and compact and of immense size, and the fragrance is delicious. The color is very distinct; elegant.
MR. PLIMSOLL—This is a very attractive Hyacinth, bearing immense spikes of pure white with a delicate blush.
PINK BEAUTY—Large, tall spike, very shapely bells of the largest size. This well deserves the name of Pink Beauty, as it is the finest of all pink Hyacinths. Extra.
ROSEA MAXIMA (Marconi)—A grand large truss of deep rose; some would call it a red.
WILLIAM I.—Beautiful purplish-black; a grand variety. Early.
YELLOW HAMMER—Deep golden-yellow. A very refined and chaste color.

Choice Collection of Fancy Single Hyacinths

In this collection we place all the high-priced varieties. There is such a demand for them in Europe, where they are well acquainted with the good sorts, that the demand exceeds the supply, and they are always scarce and hard to get. When you have the following twelve Hyacinths in your possession, you have the very best that money can buy. They are every one gems of the first water. **Price, 15 cents each; \$1.50 per dozen.**

In ordering, say "Fancy" Collection of Hyacinths. They are the largest, the most delicately colored and the most fragrant of all Hyacinths.

BIRD OF PARADISE (City of Harlem)—The spike is the largest of all yellow Hyacinths. The color is a rich deep golden-yellow. Very pure. No other yellow Hyacinth approaches it in either color or size.
CZAR PETER—This is without question the finest of all light blue Hyacinths. The truss is very large and solid. The color is a delicate sky-blue. This Hyacinth is admired more than any other variety of any color in Holland. Simply grand.
ENCHANTRESS—Do not forget that the porcelain-blue color in Hyacinths is the most admired and in greatest demand. This is a delicate porcelain-blue color. Extra fine.
GRAND MASTER (Grand Maître)—Deep porcelain-blue; one of the grandest of all blue Hyacinths. Much prized in Holland.
KING OF THE BELGIANS ("Roi des Belges")—So many persons complain that they never get a bright red Hyacinth. The color of this grand variety is a rich, glossy ruby-red of the brightest hue. Certainly a gem.
KING OF THE BLUES—This is the richest and most elegant of the dark blue Hyacinths; it is so dark that the texture of the flower seems covered with a rich sheen of velvet almost black. Exquisite.
KING OF THE YELLOWS—A very pure yellow color, one of the richest and best; none better.

LADY DERBY—This is said by all who have seen it to be the best dark rose-colored Hyacinth yet offered. The florets are extra large. Spike solid and compact and of immense size, and the fragrance is delicious. The color is a rich, deep rose, very bright and distinct. Elegant.
LA GRANDESSE—This variety deserves the name of Grandesse. Splendid, immense spikes of large pure ivory bells, waxy in appearance, vieing with the snow in purity, while its fragrance is delicious, yet penetrating. Simply exquisite. The best of all whites. Extra fine. Immaculate in color.
LA VICTOIRE—This is a bright red Hyacinth of the greatest merit. The color is a rich, even shade of bright red. Superb.
QUEEN OF THE BLUES—In Holland the delicate blue Hyacinths take precedence over all other colors, and the blue varieties in this collection cost much more than any other color. With Czar Peter this variety is a sure enough rival. It does not conflict with any of the other blues in this collection, being entirely distinct, a delicate porcelain-blue, a color that is extremely rare in flowers of any kind. Extra fine.
SIR WILLIAM MANSFIELD—This is the rare color in Hyacinths, being a most beautiful shade of lilac or violet. When you see this in flower you will always remember it.

Remember that the Foregoing Twelve Hyacinths are the Best Singles in Cultivation.
 Get Them and You Will Have the Best.

Five Beautiful Roman Hyacinths

We wish to call special attention to these beautiful Roman Hyacinths, which are so valuable for early winter blooming. They are among the few flowers which can be had as early as Christmas and New Years. Each bulb throws up several spikes of flowers, which are very beautiful and fragrant, and when kept in a cool room will keep perfectly for weeks. Three can be planted in a four or five-inch pot, and will soon be in flower. In the garden they are the first of all Hyacinths to bloom. We offer extra large bulbs. The new double ones are exceedingly fine. Do not fail to plant a good lot of them for winter. **Price, 10 cents each; \$1.00 per dozen.**

BLUE—Lovely light blue, a fine contrast to the white variety.
CANARY YELLOW—Few novelties have come out recently which will in importance surpass this new yellow Roman Hyacinth. There is nothing to be said of it except it is like the common Roman white, except in color, which is lovely shade of light yellow.

PINK—A grand new sort with enormous bright deep bells in large spikes.

RED—A beautiful shade of deep red, very bright and penetrating.

WHITE—Has elegant waxy-like bells of great beauty and fragrance.

Mixed Hyacinths---For Bedding Out in the Fall

These Mixed Hyacinths are used almost exclusively for bedding out in the fall on account of their cheapness. They are just as good colors and just as fragrant as the named varieties; the difference is in the cost of keeping the named sorts separate, both while planting and after they are dug. The exact shades cannot be given, but the general outline of colors are kept separate, so that in ordering you know what color you are buying. **Price, 12 cents each; \$1.25 per dozen.**

Early Flowering Double Tulips

These Tulips have massive flowers of brilliant and varied colors, shades and markings, and being double, the flowers last much longer in bloom than single varieties, add in consequence when singles and doubles are planted in conjunction the "time of the Tulips" is greatly prolonged. Double Tulips are beautifully adapted for beds on the lawn, in the garden, and for mingling in clumps of half a dozen or more around the edge of shrubbery. They are robust growers and exceedingly effective. The early sorts do splendidly when grown in pots for winter blooming, but must be forced much slower than Single Early Tulips, by keeping them cooler. Those preceded with a star are the best varieties for forcing indoors.

Early Flowering Single Tulips

Those marked with a star are the best for forcing in the house, but all Tulips are fine for garden culture. Tulips are such universal favorites that it is scarcely necessary to expatiate upon their merits here. Their ease of culture, combined with beauty of form and gorgeous coloring, render them the most popular bulbs grown for spring bedding, and for winter flowering in the greenhouse and window garden they are incomparable. The Tulip is extremely hardy and of easy culture, flowering as freely in the shade as in the sunshine and producing as fine flowers in a confined town garden as in a more favored place. Double and Single Tulips when associated together and planted in front of shrubs, maintain a longer display than if either are separately planted.

The Single Tulip has a greater variety of rich, delicate and attractive colors than any other selection of spring flowering bulbs. The Single Tulip is extensively grown for indoor decorations three or five bulbs in a pot.

DARWIN TULIPS

LONG STEMMED—LATE FLOWERING

A new family of Tulips of stately, noble and dignified character. Too much cannot be said in praise of this class of tulips. There is scarcely another spring-flowering bulb to rival Darwins. They excel in brilliancy of colors, perfect form of flowers and strong stems. For splendid effect in borders and planted in small groups amongst shrubs they are unsurpassed. As a cutflower, they are of great value. Grow three feet high, bearing immense large flowers, 3 to 4 inches in diameter. The most unique and richest colored of all the Tulip family. Their colorings vary from the light tints of white, lilac, rose and brown to deep violet, brilliant red, dark brown and black. Very late flowering.

Cottage or Mayflowering Tulips (LATE FLOWERING SINGLE)

The Tulips belonging to this class owe their name to the fact that many of them have been found growing in gardens of country houses and cottages in England and France. Old Dutch or Breeder Tulips

The Breeder Tulips are the unbroken forms of the old florists' Tulips. The blooms strongly resemble the Darwin Tulips, excepting that they have an entirely different range of color, comprising artistic tones of bronze, terra cotta, orange, and brown. Breeder Tulips are May-flowering, producing blooms of enormous size, and because they are vigorous growers are valuable for the garden. We have taken great pains to select only choicest varieties, and can heartily recommend these to anyone who wishes something especially fine.

Mixed Tulips

We have a large stock of unnamed Tulips for bedding, which we price so low as to make a large mass of these showy flowers a matter of a trifling expense. They are excellent bulbs, and will bear handsome blooms. Double and single collections are kept separate. Several hundred bulbs at the quotations below involve less expense than is required to secure a few summer bedding plants, and they are fully as valuable.

Superfine Mixture, Single Tulips —In fifty choicest kinds. Splendid flowers. 75 cents per doz.; \$5.00 per 100.	Superfine Mixture of Darwin Tulips —Price, 85 cents per doz.; \$6.00 per hundred.
Superfine Mixture, Double Tulips —In fifty choicest kinds. Splendid flowers. 75 cents per doz.; \$5.00 per 100.	Superfine Mixture of Parrot Tulips —Price, 85 cents per doz.; \$6.00 per hundred.

Tulips

Tulips should be put into the ground when the leaves begin to fall from deciduous trees. This is probably a better guide of the time of planting than any definite date would be, since climatic conditions vary so much.

After planting, a litter of leaves should be placed over the beds as soon as a thin crust of the ground is frozen. This cover should be removed early in the spring, before the Tulips have a chance to come through the ground.

DAFFODILS AND NARCISSUS

The Golden Daffodil, the earliest harbinger of the joy that is to come with the awakening of Mother Earth after her long winter's sleep, as Shakespeare says: "Daffodils—That comes before the swallows dare, and take the winds of March with beauty." Fine both for garden, and those preceded by a star (*) for forcing indoors.

Note—In describing Narcissus we have referred to the "perianth" and "trumpet;" the latter is the long center, funnel-like tube, and the "perianth" is the surrounding row of petals, or leaves.

Single Narcissus

Single Narcissus are divided into the following classes:

- AJAX**—Large trumpets, either white or yellow, perianth and trumpet of the same color.
BARRI—Diameter of cup less than one-third of the length of the petals.

They are of exquisite beauty and entrancing perfume. It is grown by the Chinese according to their ancient customs to herald the advent of their new year and as a symbol of good luck. The bulbs are grown by a method known only to themselves, whereby they attain great size and vitality, insuring luxurious growth and immense spikes of flowers. In fact, the incredibly short time required to bring the bulbs into bloom (four to six weeks after planting) is one of the wonders of nature. "You can almost see them grow," succeeding almost everywhere with everybody. They do well in pots of earth, but are more novel and beautiful grown in shallow bowls of water, with enough fancy pebbles to prevent them from toppling over when in bloom. A dozen bulbs started at intervals will give a succession of flowers throughout the winter. We are importing direct from China immense bulbs of the true large-flowering variety. Crocuses, among the earliest and brightest of spring blooms, have been cultivated as far back as floral history goes. Winter is scarcely over when the rosy Crocus Imperati peeps from under the blanket of snow. The Crocus is one of the first flowers of spring, and one of the best for blooming in the house during the winter. Half a dozen bulbs may be planted in a pot, and will

make a very pretty show. For garden culture plant bulbs two inches deep and two or three inches apart. They are so cheap and pretty they ought to be found in every garden in abundance. They bloom splendidly when planted on the lawn among the grass. They lift their bright heads up through the sod very early, and give the lawn a charming aspect. Blooms in June and July. It bears from five to twenty blossoms. This is the most decided variety we have in expressing its preference for a planting time. It must be planted in the early autumn to succeed well, as it makes its leaf growth at once after planting, and prepares itself for early flowering. The bulbs are sometimes kept in cold storage for spring sales, but never do quite so well. It should be planted in the fall. Customers will do well to plant a bed of twenty-five or more for a permanent bed or border. 40 cent each; 6 for \$2.00; 12 for \$3.50.

Our Bulbs reach this country about September 10th, so do not become impatient if your order does not reach you before September 15th, as it takes a few days to get the bulbs through the customs house. We will ship order as soon as bulbs reach us.

Lilium Giganteum

THE TRUE BERMUDA EASTER LILY.

This peerless Lily is the greatest acquisition to floriculture made in many years. Their profusion of bloom, the remarkably short time required to bring them into flower, and the certainty to produce abundant bloom, and also the ease with which they can be manipulated to be flowered at any desired period, such as Christmas, Easter, and other special occasions, make them invaluable. The flowers are delightfully fragrant, pure waxy-white, of great substance, and if cut as soon as they are open or partially open they can be kept for two weeks. A short time only is required to bring them into bloom. Bulbs potted in August can be had in flower in November if desired. A succession of bloom can be kept up from November to May by bringing the pots of rooted bulbs in from cold frames at intervals during the winter. The quantity of bloom produced is marvelous. Blooming plants in pots form typical Easter offerings and presents, for decoration of window, table, house or church. As a garden Lily it is of great beauty, being entirely hardy except in Northern climates, where it requires a protection of leaves or litter to the depth of five or six inches. 40 cent each; 6 for \$2.00; 12 for \$3.50.

Regale Lily

REGALE LILY—Vigorous constitution, medium in height, bearing one to several handsome, white, fragrant flowers; slightly shaded pink outside and the lower inner surface primrose-yellow. It is a hardy Lily and considered one of the finest novelties offered in many years. It seems to thrive on any good soil not too wet. We find it one of the easiest Lilies to grow. Everyone who sees a L. Regale bed in bloom admires it. Blooms about the same time as L. Candidum. 75 cent each; 6 for \$3.50.

Winter-Blooming Freesias

PURITY—No description can do adequate justice to this beautiful plant. The flowers are two inches long and about the same in width, shaped like miniature Gladioli, and borne in clusters of six to ten on depressed horizontal scapes. The body of the flower is pure white, with lower segments spotted lemon-yellow. The perfume is most delicious, being a mixture of Mignonette, Violet and Jasmine, and one plant is sufficient to perfume a large room without the overbearing perfumes of Hyacinths or Tuberozes. The plant has tooth-shaped bulbs and flat, spreading leaves. Its cultivation is the simplest, requiring only to be potted in October, to be watered sparingly at first, placed in a sunny window, and watered more as growth progresses. When out of flower, store in some place, and repot at proper season in fresh soil for another year's growth. 6 cents each; 6 for 30 cents; 12 for 50 cents.

These bulbs make a wonderful house plant on account of their rich perfume.

Lily of the Valley

The modest bell-shaped flowers, of the purest white, are highly prized for cutting purposes, and for flowering in pots in winter they are exceedingly well adapted. Beautiful and most interesting ornamental designs for the parlor or conservatory may be produced by planting Lily crowns in Crocus pots or in pyramidal pots made especially for this purpose add pierced with holes. They will last several weeks in beauty. By taking them in at intervals a succession of different designs may be kept up all winter. They are also forced in immense quantities by florists, but they are the most charming when grown in large patches in partially shaped localities around the lawn, near the borders of streams, lakes, etc., being perfectly hardy. **Price, 4 cents each; 40 cents per dozen; 25 for 75 cents.**

The Grape Hyacinth, Improved

This charming little gem should be found in every garden in abundance. It has been termed the "Blue Lily of the Valley," add when planted in a mass with that sweet flower it does resemble it to some extent, and forms a most fascinating combination. It grows about the same height, and blooms about the same time each spring. It increases rapidly, and when once planted a mass of beautiful blossoms, which will increase each year, is insured for a lifetime. But for winter blooming in pots it is of the greatest value. Plant five or six bulbs in a five-inch pot, and you will have as lovely a pot of bloom as you can imagine. Words fail to do it justice. Flower stems grow a foot in height, bearing a dense spike of sky-blue bells tipped with white, and oh! so lovely. Please remember that ours is an improved strain of Grape Hyacinths, much superior to the old form.

SNOW WHITE—New and scarce. 6 cents each; 6 for 30 cents; 12 for 50 cents.

AZUREUS—Deep blue; blooms out of doors in February, earliest of all spring bulbs. 8 cents each; 6 for 40 cents; 12 for 75 cents.

The Feathered Hyacinths

A very pretty and curious species of Hyacinths, the flowers of which are a feathered plume, borne on the edd of a large spike. It is perfectly hardy, and is particularly adapted for open ground planting and for indoor culture. 8 cents each; 6 for 40 cents; 12 for 75 cents.

Ixia

The Ixias produce their beautiful flowers in spikes, and are of the most dazzling add brilliant colors, and sure to attract attention. It is only a few years that they have been grown in this country to any great extent, but in that time, like the Freesias, they have become very popular. For pot culture in the house they give great satisfaction, being of easy culture and free bloomers. Half a dozen bulbs can be planted in a five-inch pot, and the display is magnificent. For open ground culture give them winter protection with leaves or straw. They are very cheap, and all lovers of odd and beautiful flowers should certainly add them to their collection. The sorts we offer are new and very fine. 6 cents each; 6 for 30 cents; 12 for 50 cents.

Giant Snowdrops

Beautiful dwarf white flowers, pushing up through the snow in the spring. They are lovely little blossoms, and should be found in every garden. In doors they are equally pretty and easily brought into bloom. Being dwarf, they are usually planted along walks or margins of beds. The Giant Snowdrops we offer are much superior to the common varieties.

A Report From Some of Our Pleased Customers on Their Success With Our Roses

Dear Sirs:—First of all I want to thank you for the splendid roses you sent on my order March 31st, which are doing exceptionally well this year and the roses I have purchased from you previously all are blooming beautifully. I have established quite a reputation in rose growing, having visitors from all our suburbs and each one is very enthusiastic about my garden. Now I am very willing and anxious to give due credit for the quality of the rose bushes, as I know that without the quality of rose bushes you cannot produce fine blooms no matter what manner of care was given them. I have always found that the roses I purchased from you were true to name and were just as you represented them. Am a member of the Garden Club of Norwood and having grown roses for about fifteen years, it is my turn to give my talk at the Club and the subject I have been assigned is roses, a subject I am perfectly familiar with and I have been urging more people to grow roses as I feel it is a plant people think no one except an expert florist can grow and there is no flower that gives more pleasure and has a more dignified place than the rose; it is the queen of all flowers and I have a great many varieties of all kinds from early spring until the winter sets in. Would you care to send me about thirty of your catalogs of Spring, 1922, as I should like to give one to each of our members and I have no doubt you will receive orders from a good many of them when they want roses.

Respectfully,

Mrs. W. G. R.

Hamilton, Ohio.

Dear Sirs:—Much has been said and written of the differences and advantages of roses grown on own roots and budded and grafted.

My experience in the late winter and spring of 1920 has convinced me of the advantages of own-root roses. As your record will show, I purchased a number of your own-root roses during the past ten years and now have a bed containing nearly 100 roses.

In the fall of 1919, I covered this bed liberally with straw for winter protection. During the winter of 1919-1920 we had considerable ice and heavy freezes. When I removed the straw in the early spring I was surprised to learn that the icy condition during the winter completely destroyed the tops of the roses to such extent, that I could not even locate a plant. To my surprise early in April new growths began to come forward and when early June arrived, the old bed was covered with a "carpet" of roses. We had the pleasure of having roses on our table constantly during the summer and gathered a bouquet of roses as late as November 6th.

If any of your customers have met with disappointment, or if any prospective buyers desire real pleasure, let them try a bed of "own-root" roses of such varieties as Etoile De France, Radiance, Kaiserin, Sunburst, Killarney, etc., and use liberally of sheep manure for fertilizer and give proper care and the rose bed will be a success and pleasure.

Yours truly,

H. W. B.

Hobart, Oklahoma.

Dear Sir:—Every one knows we have the flower yard of the town. Ninety per cent of these flowers came from you and ninety-nine per cent of the flowers purchased from you during the past four years have grown and were as represented by you.

The fifty roses from you last spring all as represented and forty-nine of them leafing out fine and dandy now.

Yours very truly,

A. B. H.

The Glory of the Rose

(Copied.)

THE rose has been known to man from the earliest hours of history. It has been mentioned in story and song in all ages. It is the eternal flower of love, the emblem of sentiment. "All the world loves a lover," said Emerson. And it is true that all the world loves roses, probably for the same reason. Cherished in the palaces and gardens of the rich and mighty, it is, nevertheless, the flower of all classes and stations in life.

The fancier may differ in his tastes; the pocketbook may dictate the choice of many; the wealthy gardener may have the most exquisite flowers of every land and clime at his beck and call, but all unite in claiming the rose as the first flower. And this universal love for the rose is unequaled elsewhere in all the things which Nature has given us.

It grows wild in the temperate zone thruout the world. When the pioneers poured down over the Allegheny Mountains and into the plains of Kentucky and Ohio, later upon the prairies of Illinois, Iowa and the West, they found the wild rose everywhere. Full many a prairie home was gladdened and enriched in those troublesome days by the splendor and color of the wild rose. It brought a vision of peace and lofty sentiment to those sturdy souls in their hours of struggle; it gladdened the hearts of the lovers and brightened frontier weddings without number. The first flower that the bride planted in her dooryard, whether in the forests of Kentucky or in the sod hills of Kansas, was the queen of the prairie, the wild rose.

The rose has left an imperishable imprint upon the literature of all times and races. During the days of feudalism and chivalry, it was the accepted badge of favor. Sturdy knights and mighty warriors battled the one with the other in contests of prowess to win the rose of some fair lady. To have this token from the gentler sex was a higher tribute than any that royalty might bestow.

In the period of the Renaissance, when the blight of the Dark Ages was lifting before the dawn of modern literature, we find the rose still the favorite of mankind. When Dante thought of love and the queenly Beatrice, he sang sonnets to the rose.

To trace the rose in literature would be to produce a compilation of the work of all authors and poets. Never has man or woman achieved fame in letters without writing of the rose. The literature of France, of Spain, of England, of Ireland, of sturdy old Scotland, of Scandinavia, of America, is replete with it.

We find it even in the fables of antiquity. Among the ancients it was held sacred to Cupid and Venus, called Eros and Aphrodite, respectively, by the Greeks. They considered it the emblem of joy and love, and at the same time, of prudence.

The Romans placed it over the door when a feast was in progress and whoever passed under it incurred a solemn obligation not to reveal what was seen or heard. From this custom has sprung the term "sub rosa," meaning "under the rose," as applied to anything revealed in confidence.

Later, it was placed at the entrance to confessional at Rome, as a symbol of secrecy. In poetry, it has ever stood as a symbol of purity and innocence; to all classes it has ever been the emblem of everything beautiful and delightful.

In art, as in literature, we find it going back to the very dawn of the Aryan race. It is seen in the art of the Greeks, the Romans, the Egyptians, the Assyrians. The Etruscan rose is almost as famous as the Etruscan vase. The rose has been distinctly a favorite of the Western world, as distinguished against the Orient. It is strikingly absent in the horticultural affairs of the early Chinese and Japanese.

In history, the rose has played an important part. In the days of Heraldry, it was a badge worn by whole armies. The badge of the House of Lancaster was the rose gules, and the rose argent of the House of York. Henry VI, king of England, was surrounded and supported by the adherents of the House of Lancaster in his claim to the throne. Richard, Duke of York, had a better

claim to the throne by descent and his adherents provoked one quarrel after another with the Lancasterians, in the hope of ultimately placing Richard on the throne. The personal emblem of the Duke of York was a white rose, which his followers adopted in order to distinguish friend from foe. The House of Lancaster promptly adopted the red rose as its emblem. From this fact, the struggles between the two families for the throne of England which lasted several years, came to be known as the "War of the Roses." Thus the rose played an important part in at least one war, a war which destroyed the flower of English manhood add eventually made it possible for the French to drive the English off the continent forever.

Roses in the future are going to be better understood by the people at large; they are becoming more and more common in family gardens and the uses to which they may be devoted in addition to their bloom, will bring a fuller realization of the glory and beauty of the rose to every lover of Nature. Too long we have labored under the impression that rose culture was not for the masses; that this queen of the florist's art was distinctly a creature of skill add intricate care. Too long our gardens have been bare of the queen of flowers and our vases empty.

The rush of commercialism in the early days of the present industrial age seemed to sweep all sentiment, all love for the leisurely joy of growing things and enriching life and home with flowers, out of our lives. But the advent of universal prosperity, the coming of the thought that of all attainments the home is the most important, the settling down of America to enoble and to enrich herself in the worthier things, has swept back that old desire, that old longing, for the "vine over the door."

And never before has the great middle class been so favored, whether here or elsewhere. The modest backlot gardens in many cities outrank those of the aristocracy of yesterday. Many a busy housewife has a larger and better garden than that boasted by her Colonial grandmother.

The natural love for the rose has had a great deal to do with this revival of the interest in floriculture. Hardly has sod been turned before thoughts of roses blooming in the garden come to the garden lover. It assumes expression often before a shrub is planted or lawns established.

The rose stands for permanency. It has none of the disadvantages of annual flowers which endure for a season and must be planted again each succeeding spring. It endures from year to year, blooming each season and attaining a varying growth depending upon variety. It blooms the first season, if properly established, and continues to repay the gardener thruout the years. The Teas and Hybrid Teas are, as a general rule, continuous in the blooming habit and one or two of the Hybrid Perpetuals display the same admirable trait.

There is a rose for every climate where people live in any considerable numbers. Wild varieties are found in Lapland and Labrador. Even the delicate teas are successfully grown outdoors in Canada, where thousands of them are to be found in the public parks.

As there is a rose for every climate, so there is a rose for every purpose, susceptible of outdoor cultivation. From the tiny polyanthus to the giant and rugged rugosas and climbing varieties, there is a wide selection for almost any condition that may be present. Unsightly terraces or bare spots in lawn or park or cemetery may be made a place of beauty with the creeping varieties.

In the rose we find all the variations which climate, nature and skill in man can combine. It is not extraordinary, then, that the rose should have the universal place it holds in the hearts of so many people in all classes and in all climes. It is the universal flower and its appeal in that direction is only indicative of its merits.

ROSES FOR OUTDOOR PLANTING

CULTURAL NOTES.

The cultivation of roses is as follows!

The Soil—The soil which best suits the Rose is a deep, unctuous loam, with free drainage, as Roses do not thrive where there is stagnant moisture. If these conditions are not to be had naturally, they must, as far as possible, be provided. In the first place, if drainage is bad, the soil must be thrown out to a depth of 18 inches, and, if it is not convenient to use tiles, about 5 or 6 inches of broken bricks or other rough material should be thrown in the bottom, and a layer of turf laid on top, grassy side down. On the top of the turf should be placed a layer of well-decayed farmyard manure, then a light layer of soil, and another layer of manure, on top of which should be placed the remainder of the soil, to which, if light and sandy, should be added a liberal supply of well-chopped-up turf, raising the whole of the bed to a height of about 12 inches above the original level of the soil. In case of heavy land, a layer of lime rubble should be added, as this will help to sweeten the soil.

Planting—Should be deferred until the soil is in proper condition to receive the plants, as it is a great mistake to plant in wet soil. Teas and Hybrid Teas should be planted about 18 inches apart and the Hybrid Perpetuals 2 feet apart, keeping all manure away from direct contact with the roots when planting. Firm the soil well around the plants and give a thorough watering.

Pruning—All the short, prematurely ripened wood and all

small shoots should be cut clean away, leaving just the strongest shoots, from 4 to 6 inches long. Pruning should be done immediately after the plants are set out, if it has not been previously done.

This close pruning does not apply to the Hardy Climbers or Ramblers; these should be shortened back if they have grown beyond their allotted space and thin out the very small shoots.

Protection—Before the ground freezes solid the soil should be pulled up around the base of the plants, 7 or 8 inches, and the surface of the bed afterward well covered with dried leaves or cornstalks. When so protected, even the most tender varieties of Hybrid Tea Roses are entirely hardy as far north as Winnipeg.

This condensed list is the cream of the varieties suitable for American culture today, especially Columbia, which has asserted itself as being the very finest outdoor pink Rose so far produced.

To dig and delve in nice clean dirt
Can do a mortal little hurt.
To live 'mongst lush and growing things
Is like to give the spirit wings.
Who works 'mongst roses soon will find
Their fragrance budding in his mind.
And minds that sprout with roses free—
Well, that's the sort of mind for me!

Fashion changes with the ages. The rose was the queen of flowers to the ancients, just as it is today, but the rose leads all flowers, on account of its adaptability to every decorative purpose.

The "Excelsior" List of Ever-Blooming Roses

New and Choice for Outdoor Planting or House Culture

Price, 20 cents each, except where noted; two-year Plants, 40 cents each, except where noted.

For general planting, more especially in open ground, this class excels all others. One-year-old plants, such as we send by mail, bloom the first and each succeeding year from early spring until severe frosts. Two-year-old plants, of course, yield a greater profusion of flowers, owing to their size. The flowers are noted for their exquisite coloring and delightful fragrance; hardy everywhere in open ground with protection of litter, leaves, evergreen boughs or similar materials. Plant liberally of one-year-old Roses; the harvest of bloom they give the first year compensates for the trifling outlay. Anyone can succeed with them.

MADISON—Pure white, exquisite.

MAMAN COCHET (The Queen of all Garden Roses)—Such beauty and exquisite form as is possessed by this variety is well-nigh marvelous, and cannot be seen in any other Rose we know of. The buds are beautiful, large, full and firm and elegantly pointed; as they expand they show great depth and richness sometimes measuring two and a half inches from base to tip. New Polyantha, or Baby Roses

Price 25 Cents Each; Two-Year Plants, 50 Cents, except where noted.

BABY DOROTHY—This is a glorious Rose. Flowers resemble the Dorothy Perkins. Completely hides the plant with its bloom.

BABY ECHO—The best Polyantha produced. Color rosy-flesh. Of splendid strong growth and freedom of bloom, which are of wonderful keeping qualities either on or off the plant. This is the improved Baby Tausendschoen. It has more substance and more color, and is the best of all Baby Roses for pot culture. Be sure and try this one.

BABY TAUSENDSCHOEN, or THOUSAND BEAUTIES—Its flowers are large, so much like Thousand Beauties, that it has been rechristened Baby Thousand Beauties. It is a bush form of the Thousand Beauties, having all the charm of the variable coloring in its flowers that its parent has, being firm, white, delicately flushed pink, changing to deep rosy-carmine. A splendid Rose. Try it.

CLIMBING ORLEANS-ROSE (Levavasseur & Fils, 1913.)—In all respects, excepting growth, identical with the normal type from which it is sported. The growth is most vigorous and of true climbing character; perpetual flowering. 40 cents each.

EDITH CAVELL—Bright crimson; white eye; very beautiful. One of the best new Baby Roses.

ETOILE LUISANTE, or BABY HERRIOT—Just picture to yourself the Fairy or Sweetheart Rose ("Cecile Brunner") colored up like the Daily Mail Rose ("Mme. Edouard Herriot"), only brighter and more brilliant than when that variety is at its best, and you will have some conception of the beauty of this little gem which on account of the similarity in color has been known among the cut flower trade as Baby Herriot. Its color is a shrimp-pink with intense, coppery-scarlet suffusion, the base of the petals golden-yellow which intensifies and lightens up its high colors. Plant is of free growth and floriferous. We are certain that Baby Herriot will please everyone.

GEORGE ELGER—A lovely little golden-yellow Polyantha Rose, with a good admixture of Tea blood; like all of its class, it is free in growth, free in bloom, with small, glossy foliage pro-

duced in profusion. The dainty little pointed yellow buds open into pretty little symmetrical Roses. Will prove a very popular corsage variety; is grown in quantity now for this purpose.

GRUSS AN AACHEN—Yellowish-rose colored with salmon-pink and red shadings; full, strong, free blooming and disease proof; erect and of moderate growth. Owing to the size and beauty of its flowers and its symmetrical growth, this variety is highly recommended for low, brigit massing.

S., and Gold Medal Paris.

ORLEANS—The showiest and prettiest of all the Baby Ramblers. This charming and dainty Rose is of beautiful rounded habit and is a huge bouquet of deep cerise or Geranium-pink, with distinct showy center of pure white; florets not crowded, but of beautiful arrangement, making as a whole a charming combination that cannot be beaten. Color is irresistible. Plant grows like a weed, and the flowers are nearly "immortelle" in their lasting qualities. Awarded gold medal.

RED ORLEANS ROSE—Color is brilliant geranium-red, suffused with rose, and center white. The flowers come in great trusses and make a fine showing all summer. This Rose when massed in solid beds or along borders is very fine. Awarded a gold medal. 40 cents each.

TIP TOP ("Baby Doll")—This delightful little "Sweetheart" Rose is a wonder. The color is absolutely new, and quite startling in its brilliancy, golden-yellow tipped with clear, bright cerise. The foliage is narrow, long and sharply pointed, a deep glossy green—a very beautiful setting for the lovely little doll roses, a bunch of "Baby Doll" being an even parterre of delicious color.

Dwarf Polyantha, or Baby Roses

A class of miniature Roses derived from the Climbing Polyantha. They are of dwarf habit and bloom so freely as to cover the entire plant with bloom all through summer and fall. The plants are splendid for bedding, or as edgings for borders they are hardy. Let us tell you something about these miniature Roses. While Europe has appreciated these Roses for years, America is just beginning to wake up to the fact that they have come to stay. They are useful either pot grown or for bedding purposes or for hedge effect. **20 cents each; six for \$1.00; two-year plants, 50 cents each; three for \$1.25.**

- CLOTHILDE SOUPERT** (Soupert & Notting, 1890)—(H. Poly). Known the world over as one of the very best of all bedding Roses. The only rival of "Hermosa" as a bedder and market pot plant. The color effect is beautiful ivory-white, shading toward the center to bright silvery-pink. Everybody's Rose.
- ELLEN POULSON**—Dark brilliant pink; fragrant; fine.
- ERNA TESCHENDORFF**—Deep crimson flushed with carmine; very dark.
- JESSIE**—Bright cherry-crimson. Superb.
- LE PONCEAU**—Dark red in large clusters.
- MADemoISELLE CECILE BRUNNER**—This is the popular Baby Pink Rose. It is also known as Sweetheart and Mignon.

In the past year or two this Rose has fairly jumped into popularity. It always was a popular outdoor Rose on the Pacific Coast, but recently even in the effete East and everywhere in America they are planting it simply by thousands for cut flowers. It has become quite the rage. It makes a handsome miniature Rose, coming in sprays of three to five buds and combines in beautiful effect with so many other flowers in all kinds of floral work. It is a very prolific bloomer and if carefully protected in the winter should be a money-maker, both outdoors and under glass. The bud and flower are both handsome. Color, bluish, shaded light salmon-pink; distinct and desirable.

- MRS. WM. H. CUTBUSH**—Flowers the delicate pink of Dorothy Perkins.
- PERLE d'OR**—Coppery-orange, changing to fawn.
- PHYLLIS**—Pretty, bright carmine-pink, very bushy and of branching habit, producing long feathery panicles of flowers from June until frost. A novel Rose, ideal for bedding, massing and decorative use in pots.

This is a true Cochet Rose, and after two years' trial in the garden we pronounce it as good if not better than any Rose for the garden ever sent out. We bought the entire stock of this Rose, paying \$1,000 for two plants, this being by far the highest recorded price ever paid for any Rose. The color is a delicate yellow suffused with pink, each petal edged deeper, very chaste and beautiful. The color, with its immense size and exquisite form, makes it without question the greatest Tea Rose ever introduced, and we are proud to have brought it out.
- HELEN GOULD**—A rich red Rose that is a great bloomer; the shade of red has been described best as a watermelon-red; elegant.
- KAISERIN QUGUSTA VICTORIA**—A grand white garden Rose that has stood the test of time. Full and double; fine buds and flowers.

The buds are beautiful, large, full and firm and elegantly pointed; as they expand they show great depth and richness, sometimes measuring two and a half inches from base to tip.

- Flowers superb when open, extra large, perfectly double and of splendid substance. Small pot plants will in the open ground quickly make large, strong bushes and produce, on long, stiff stems, great numbers of perfect flowers that are enchanting in fragrance and delicate brightness. The color is rich, clear pink, changing to a silvery-rose. As we see it, one good Rose like any of the Cochet Roses is worth a whole collection of poor ones.
- PRESIDENT TAFT (McCullough, 1908)**—This Rose was raised in Cincinnati, the home of President Taft, and let us say right here, while some of you may not admire the President himself you will, one and all, admire the Rose given his name. It is without question the most remarkable of all pink roses. It has shining, intense, deep pink color possessed by no other Rose. It is a fine grower, free bloomer, good size and form, fragrant and in a class by itself as to color. Our Mr. Frank Good, who is probably familiar with more Roses than any man in America, says: "Talk all you want to about the Rose President Taft, and then you will not say enough."
- RADIANCE (Cook, 1909)**—A brilliant rosy-carmine, displaying beautiful rich and opaline-pink tints in the open flower. The form is fine, largest size and full, with cupped petals. It blooms constantly and is delightfully fragrant. This is a superior Rose.

The flowers are clear, bright red, of good size and of double, full, cupped form, lasting a long time in good condition. Beautiful in bud and bloom and the most fragrant of the Climbing Roses. A vigorous grower and free bloomer. The large glossy foliage, like that of Silver Moon, greatly enhances the beauty of the flowers. 25 cents each; two-year plants, 50 cents.

CHRISTINE WRIGHT, or PINK CLIMBING AMERICAN BEAUTY—This is identical with the red Climbing American Beauty described next below this variety; flowers four inches in diameter; color bright, clear pink; immense. Its fine salmon-pink flowers are indeed very beautiful. A strong, rampant climber, with leathery dark green foliage. Very free blooming. 40 cents each.

CORONATION (H. W.)—A lovely Rose to use along with Wichuraiana when planting on banks or terraces. NEW POLYANTHA, OR BABY ROSES---Concluded

RED DOROTHY PERKINS, or EXCELSA—The defects of Crimson Rambler are its unsightly foliage in unseasonable weather and its defoliation by insects; the infusion of Wichuraiana blood assures an ornamental climber which is nearly evergreen, and this will assure this lovely crimson-scarlet pillar Rose a place in every American garden, for it is quite hardy in addition to all its other fine points. The flowers are very double, produced in large trusses of thirty to forty, and almost every eye on a shoot produces large clusters of flowers. The color is intense crimson-maroon, the tips of the petals tinged with scarlet. The finest of all red Climbing Roses. **25 cents; two-year plants, 50 cents.**

ROSARIE, or PINK THOUSAND BEAUTIES—This is a bright pink form of that famous Rose. "Thousand Beauties." A grand Rose from any standpoint. **25 cents; two-year plants, 60 cents.**

The plant is a strong grower, with large, glossy, bronze-green foliage. **25 cents; two-year plants, 50 cents.**

TAUSENDSCHOEN, or THOUSAND BEAUTIES—A Climbing Rose that comes to us from Germany. The flowers upon first opening are the most delicate shade of pink ever seen in a Rose. might be described as a white delicate flushed pink, changing to rosy-carmine. It gets its name from its many flowers and the variation in coloring. This Rose is sweeping the country like a prairie fire. **25 cents; two-year plants, 50 cents.**

GLADIOLI

GLADIOLI are among the most popular of all garden flowers. Each year the size, color, and beauty of these wonderful flowers are being improved upon. They are very easy to grow and will do well in almost any soil under any condition. If planted in the richest place of your garden and given plenty of sun and moisture they will, however, repay you with extra-large and gorgeous colors.

To obtain a continuation of blooms during the greatest part of the season, it is advisable to plant at intervals of ten days, from the last week in April until the middle of June.

Some varieties will bloom in seventy-five to eighty days from the date of planting, but most sorts require eighty-five to ninety days. Plant the bulbs about 5 or 6 inches deep and from 3 to 4 inches apart.

In October, when the foliage has turned yellow, dig the bulbs, cut the stems off within an inch of the bulbs, and dry them thoroughly. Then remove the old roots and store the bulbs in a cool, dry place where frost cannot reach them.

Their easy culture appeals to all, and the freedom from disease and insect pests is another great asset. They associate so well with all garden flowers, but above all are the decorative possibilities both as a cut flower subject and also in the garden. The collection we here offer is unsurpassed and will be a source of great delight to all who plant them. The flowers last a long time when cut. Do not be stingy in planting Gladioli, but plant by the dozen, or even by the hundred. Varieties marked with an asterisk (*) are particularly fine for forcing.

The collection we offer embraces the introductions of such noted hybridizers as Betscher, Childs, Diener, Kunderd and others. It includes the best of the new Ruffled varieties as well as the best of the new Primulinus group.

These hybrids gained by crossing the species Primulinus with the larger varieties of the Gandavensis type, have retained all the daintiness and graceful form of their Primulinus parent, even to the "hood" formed by the drooping of the upper petal, and have an added beauty of exquisite coloring, from the softest primrose to a beautiful rose. BEAUTIFUL HOUSE FERNS

There are no plants grown that are more desirable for the house than the following fine decorative Ferns. They are easily grown, free from insects and disease, and thrive well in the ordinary temperature of the living room. See that the plants have plenty of drain age and are kept well watered; never let dry out for any length of time. Everyone of these Nephrolepis Ferns is entirely distinct in every way. That we are headquarters for Ferns is evidenced by the choice assortment that we offer. No other firm offers so many distinct and choice varieties. Try us for Ferns.

The "Teddy Junior" Fern

Nephrolepis Teddy Junior.

"Teddy Junior," the Fern for every household. This grand Fern was introduced recently by G. & R. The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. "Teddy Junior" will produce about four times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a four-inch pot. **Fine young plants, 25 cents; strong plants, 75 cents.**

The "Roosevelt Fern"

Nephrolepis Roosevelt.

It is our good fortune and great pleasure to offer this wonderful new Fern, having introduced it in 1910. In this short time it stands second in popularity of all the Ferns, and will soon be more popular than even the old favorite Boston Fern. In general characteristics it resembles the world-famous Boston Fern, but it will sweep that Fern from the boards for two reasons: it produces many more fronds than the Boston, thus making a bushier, handsomer plant; then the pinnae are beautifully undulated, giving the "Roosevelt" a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. A charming and most notable variety. **Fine young plants, 25 cents each; strong plants, 75 cents.**

New Fern "Liberty"

This is our own production. In the past we have sent out Baby's Breath, Teddy Junior and Roosevelt, the three greatest Ferns today, acknowledged so by all plantmen and flower lovers, and now we add another one to the galaxy, "Liberty," no doubt the best of them. All the fronds have finely divided pinnae that give them a very beautiful appearance, while the whole plant is overlaid with a bluish cast that makes of it a very striking object.

Wonderfully beautiful, different from all other ferns. First time offered. **Fine young plants, 35 cent each; strong plants, \$1.00 each.** Be sure and try this beautiful Fern.

The "Big Four" Fern

Nephrolepis Splendida.

This is the most wonderful Fern of them all; it originated with G. & R., and is now offered for the first time. It combines the good qualities of the four most popular sorts. It has the grace of a "Boston," the wavy effect of a "Roosevelt," the fluffy effect of an "Ostrich Plume," and the uniqueness of a "Fish Tail." Some fronds will be straight "Boston," others will be true "Roosevelt" in others the ends of the pinnae will be the feathery "Ostrich Plume," while in others the ends of the pinnae will be the genuine "Fish Tail." Then again some fronds will have in a marked degree all of these desirable traits, forming a combination without parallel among Ferns. It well deserves the name of "Big Four Fern." Every one who sees it goes

"daffy" about it. This is without question the most splendid of all the Nephrolepis. Be sure and try it. **Fine young plants, 25 cents each; strong plants, 75 cents.**

The "Wannamaker Fern"

Nephrolepis John Wannamaker.

A new Fern of wonderful beauty. Long, narrow, gracefully drooping fronds. It is not so compact as Scholzei, and, therefore, is a very airy and graceful Fern, and very durable in the house. A rapid grower; quite distinct from other Ferns. **Fine young plants, 30 cents; strong plants, 75 cents.**

The "Ostrich Plume Fern"

Nephrolepis Whitmanii

A great Fern. In fact, it is a plant that appeals to everyone, and on that account will prove a much more valuable and profitable plant than other Ferns of this class. Everyone who has seen it is charmed with it. As someone has expressed it. "There is nothing like the Ostrich Plum Fern in cultivation. In decorative effect it so far out distances the original variety that there is positively no comparison to be made. We consider it the most valuable novelty that has been introduced in many, many years." It has taken gold medals wherever shown. **Fine young plants 35 cents; strong plants, 85 cents.**

The "Baby's Breath Fern"

Nephrolepis Goodii

This Fern is splendid to use for Fern Dish Planting. It has the finest foliage of all the Ferns. It is so delicate that a lady on seeing it exclaimed, "Call it the Baby's Breath Fern, as it is so dainty in texture that a baby's breath would set its fluffy foliage in motion." The fronds are very fine and filmy, on which account it has been called by some the Lace Fern. It is an improved variety, and the best of its type. Nothing is daintier or more exquisite than well grown specimens in any size. **Fine young plants, 50 cents; strong plants, \$1.00.**

BEAUTIFUL HOUSE FERNS---Concluded

The "Newport Fern"

Nephrolepis Scotti

Of much dwarfer and bushier growth than the Boston Fern. The fronds droop gracefully, and are not as long and heavy as the Boston. It is a rapid grower, and to see it in all stages of growth from a runner in the bench to a 14-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite variety. **Fine young plants, 30 cents; strong plants, 75 cents.**

The "Parlor Fern"

Nephrolepis Whitmanii Compacta

This is a condensed form of the "Ostrich Plume" Fern, with valuable characteristics added which are not evident in the parent, the pinnae subdividing, making miniature fronds which are superimposed on the main fronds, looking as if two or more were condensed into one. Graceful beyond description. **Fine young plants, 35 cents; strong plants, 75 cents.**

The "Philadelphia Lace Fern"

Nephrolepis Elegantissima

The small size pinnae, or leaflets, are subdivided into perfect miniature fronds; the side pinnae stand at right angles to the midrib of the fronds, on edge instead of flat, giving both sides of the main frond the same beautiful appearance. It is impossible to conceive of the beauty and grace of this wonderful Fern from the description. **Fine young plants, 35 cents; strong plants, 75 cents.**

The "Old Original Sword Fern"

Nephrolepis Exaltata

This is the "old original Sword Fern," the "daddy" of them all, the one plant from which all the *Nephrolepis* we offer sprang. It is entirely different from any of its progeny, having narrow fronds that are long and of very erect growth. For this reason it is more largely used as a centerpiece in vases than any of its descendants. **Fine young plants, 25 cents; strong plants, 75 cents.**

The "Crested Fern"

Nephrolepis Scholzeii.

The fronds are crested and stand erect, with a graceful arch, forming a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed ferns; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimen from becoming defective or yellow. **Fine young plants, 25 cents each; large plants, 50 cents.**

The "Boston Fern"

Nephrolepis Bostoniensis

In the vicinity of Boston, no other plant is so extensively used as this graceful *Nephrolepis*, which differs from the ordinary Sword Fern in having much longer fronds, which frequently attain a length of six feet. These arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern. This drooping habit makes it an excellent plant to grow as a single specimen on a table or pedestal. This Fern should not be compared with the Ostrich Plume Fern, as they are of an entirely different growth. **Fine young plants, 25 cents; strong plants, 75 cents.**

The "Fluffy Ruffles Fern"

Nephrolepis Superbissima.

This new Fern is quite different from all other Ferns. Its distinguishing characteristics are its dark green foliage, darker than any other Fern, its dense growth, much more compact, and its irregular shaped fronds, which give it the name of "Fluffy Ruffles Fern." The fronds are very heavily imbricated, the pinnae overlapping, and so formed as to resemble miniature Ferns, giving it the appearance of a Fern within a Fern. The plant is very sturdy in its habit. **Fine young plants, 75 cents. No large size to offer.**

Fern Norwood

A new type of the Ostrich Plume family. The frond is very compact and the pinnae are finely serrated, giving it the appearance of a strong feather plume. **Fine young plants, 50 cents each. No large size to offer.**

Special Offer The Fifteen Beautiful Ferns as named, costing \$5.25, for only \$4.25. The Thirteen Ferns in strong plants, costing \$10.10, for only \$9.00.

Dwarf Ferns for Fern Dishes

We have selected a few of the hardiest and most satisfactory varieties for filling Fern dishes. For the best effect and most artistic planting would suggest only one variety to the dish. There is no prettier table decoration for winter. **Price, 10 cents each, or we will send five distinct Dwarf Ferns for 40 cents.**

ASPIDIUM TSUSSIMENSE—The most valuable for Fern dishes; of strong but dwarf and graceful habit, of good color and of the best keeping qualities. A clean, good grower and very ornamental.

CYRTOMIUM FALCATUM, or HOLLY FERN—A beautiful and rapidly growing Fern that succeeds exceedingly well, small plants making fine specimens in a short time. Fronds resemble branches of holly, from which it takes its name.

PTERIS MAYII—A variegated variety. Low-growing and suitable for edging Fern pans or dishes.

PTERIS WIMSETTI—A beautiful low-growing Fern, suitable for table dishes.

PTERIS WILSONII—The most beautiful and useful of all the crested sorts for pans or dishes.

CARNATIONS THE DIVINE FLOWER PINKS

For beauty of flower and color, ease of culture, certainty and freedom of bloom, together with exquisite fragrance, this is well called the "Divine Flower." Plants in the open ground or in pots quickly make large specimens, and when brought indoors in the fall produce an abundance of flowers throughout the entire winter. Carnation blooms are expensive; don't buy them—grow them yourself. Pinch the plant back frequently during the summer season. In the fall bring indoors, place in a four or five-inch pot, keep in temperature of forty or fifty degrees at night, and they will yield an immense number of flowers with splendid stems, as fine as those sold by florists. If not pinched in they will bloom profusely during the summer. **We offer the finest varieties in existence.** Your order is incomplete without some Carnations.

CULTURAL DIRECTIONS FOR PELARGONIUMS

No class of plants are more showy during their blooming season than the pelargoniums, and the gorgeous beauty of the clusters of their vari-colored bloom will well repay extra care expended in their culture.

The greatest success will be attained by securing and starting your plants in the fall and winter, potting in soil well enriched with well-rotted manure, reporting in larger pots as often as the growth of the plant demands it. This will give you a fine large plant covered with bloom by the Easter period.

During the hot summer months, plunge the pot level with the earth in a partially shaded place and water rather sparingly as this is their season of rest.

About September first carefully remove most of the old soil from around the plant, repotting in fresh soil, and start into active growth. Plants thus cared for will often carry as many as 50 to 100 clusters of bloom at the beginning of their second blooming season.

Dipping or spraying with a strong tobacco tea will rid them of any insect pests that may trouble them.

PELARGONIUMS, or LADY WASHINGTON GERANIUMS

The grandest of all flowering plants; do not resemble the common Geraniums in any particular, neither in foliage nor flower; more beautiful in every way. We here offer six distinct sorts, every one entirely different in color and every one a beauty. The Lady Washington Geraniums are the handsomest of all flowers—once seen, never forgotten.

THE EASTER GREETING, OR EVER-BLOOMING SET—Price 40 Cents Each

EASTER GREETING—Planted out as a bedding plant it will bloom continually until late in the fall. It will prove the fore-runner of a new race of ever-blooming kinds, as it rivals the Orchids in beauty. This new species is the earliest of all Pelargoniums, with enormous florets and clusters, having light green foliage and of dwarf, robust growth. It blooms from March until Fall. Florets fiery amaranth-red, with five large regular shaped spots. The first and only kind to bloom as well bedded out as in pots, and to do so all summer.

GARDENER'S JOY—The ground color is apple-blossom pink, the two upper petals have blotches of carbon-brown, the florets are three and one-half inches in diameter and are joined to enormous clusters which rise above the beautiful foliage and remind one of a Rhododendron cluster. It is of a half dwarf nature and very sturdy. On account of its rapid, luxuriant growth it is a very profitable market variety.

GLORY—This splendid novelty is quite remontant, florets and

cluster very large; ground color, Cattleya-blue, very much like the Cattleya Orchid. The upper petals contain two large purple magenta-red spots, distinctly veined. An exceedingly beautiful and entirely new color in Pelargoniums. This kind has a very robust growth.

LIBERTY—A glorious flower of salmon-red, with large velvety, sharply defined blotches bordered with scarlet. Has all the good qualities of Easter Greeting, its parent, having gigantic trusses. Equally valuable as a pot plant or for bedding out.

LUCY BECKER—This grand novelty is a sport of Easter Greeting, and is like it in everything but color which is a rosy-pink. It is if anything even more free in bloom.

PRINCE—Immense large flowers, strongly crimped of fine shade, with from six to ten petals; color rich purple with velvety black blotches. Remarkably robust habit. The large clusters rise gracefully above the beautiful foliage. The blooming plant with its enormous flowers makes a striking impression.

FRENCH HYDRANGEAS

Let us tell our friends that these French Hydrangeas are the most meritorious plants brought out in years. They have enormous trusses of bloom that completely hide the plant. They are half hardy and may be planted in the latitude of Philadelphia and in the Gulf and Pacific states. They are also fine as house plants, blooming in the spring time about Easter. When kept at a temperature of 70 degrees out of doors they bloom about June.

HARDY PERENNIAL PHLOX

This is one of the most easily grown hardy perennials, and the large number of beautiful varieties now offered make it especially desirable. These noble flowers are not only beautiful as individuals, but the cheerful appearance of our gardens during the summer and autumn months is much indebted to them. They succeed in any position or soil, and can be used to advantage either as single specimens in the mixed border or as large clumps or beds on the lawn. To produce the best results, however, they should have a rich, deep and rather moist soil, and let each clump have a space of from two to three feet in which to develop. They will continue to thrive for several years with little attention, as is attested by the fine clumps about old homesteads. The ease with which they are cultivated, their entire hardiness and the extended time of blooming, combined with the varied and beautiful coloring, make them especially valuable for garden planting. The Perennial Phlox usually commence to bloom in early summer, and are brilliant with color until after several frosts have come. They are admirably adapted for cemetery planting, also for a low hedge or screen to hide old fences and unsightly objects.

The Ever-Blooming Butterfly Bush

Buddleia Variabilis Magnifica (Butterfly Bush.)

It was a matter of some thought before this highly desirable plant was finally christened with the common English name by which it goes. Several years ago there were imported from Europe some plant novelties and this one was among them. We observed it carefully for a season and were charmed with its beauty, ease of culture and free flowering habit. The name Butterfly Bush was applied to it because it seems to attract butterflies in large numbers. Particularly we notice that it is not alone the common little yellow species of butterfly, but also the large and gorgeously colored butterflies that swarm about it as though vying with it in brilliancy of color. This shrub from a young plant set out either in the spring or fall, will mature to full size the first summer, producing a handsome bush, which the first year often maintains a height of four feet. It produces long, graceful stems, which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently ten inches long. A single plant the first season will throw out as many as fifty flower spikes, which increase greatly in number during succeeding years. The year after planting, it generally commences to flower in June and continues each season until severe frosts nip it. The foliage and blooms are exceedingly fine. The shrub is rather semi-herbaceous, by which we mean in some latitudes it will die down to the ground and while perfectly hardy, we recommend covering the roots with manure, leaves or other suitable materials as winter approaches, as this will produce a heavy growth the following season. This shrub is very desirable as an individual specimen in the lawn and garden, or placed promiscuously in the shrubbery border. Fine plants, 25 cents; strong plants, 50 cents each.

Buxus

(Ornamental Box.)

(*Sempervirens*)—Useful for edging and bordering walks, etc. A handsome shrub with deep green foliage. This is not as dwarf as the *Sempervirens Nana*, but we find it so much more vigorous and hardy that we advise planting this and trimming to height required. Fine for individual plants can be trimmed into any shape desired. 20 cents each; \$2.00 per dozen; \$15.00 per hundred, by express at your expense.

Calycanthus Floridus

(Carolina Allspice or Sweet Scented Shrub.)

A most desirable shrub. The wood is fragrant; flowers of a rare chocolate color, having a peculiar agreeable odor that is very penetrating. They blossom in June and at intervals afterwards. Fine plants, 25 cents; strong two-year-old plants, 50 cents.

Deutzias

Their fine habit, luxuriant foliage and profusion of bloom render them among the most beautiful of shrubs. They flower the latter part of June.

A great favorite, and there is nothing finer or more showy, whether for planting in large masses in parks or for single plants on the smallest lawns. LIBERTY IRIS "The Fleur de Lis" of France

Long ago, so the story goes, a field of purple flowers swayed in the warm breezes that swept across the little "Flowery Kingdom" Japan. Close by the river's edge the blossoms danced as they saw their pretty reflections in the water and they were as gay as the little maids who frolicked along the paths. The blossoms were to be gathered for their lord's house, a banquet was to be given and beauty must be everywhere.

Suddenly a cold wind swept across the field, the warm sunbeams fled and the wee maids, looking affrightedly about them, saw a huge, black cloud spreading across the sky. And then came the rain, sheets of it beating the flowers to the ground as the maids rushed to the shelter of a tea house.

When the sun came once more, chasing away the rain, what a sight met the eyes of the frightened girls as they peered timidly out. The field of flowers was flattened out before them, the poor, purple blossoms dragged and torn.

But, as they gazed, a rainbow arched the sky, its end seeming to rest in the iris-field. Here and there, the bright arch touched the flowers and, as the girls watched in wonder, the field of flowers once more waved in the breeze, but the flowers were no longer only purple. Creamy-white were they and palest lavender, golden-yellow, blue, mauve, wherever the rainbow had touched, there was a flower the color of the rainbow! And so, to this day, this flower is known as "The Goddess of the Rainbow."

Today no longer are iris to be found only in Japan. The simplest, smallest garden in America may possess them. They grow so freely, they respond to care so readily, that, whether you own a vast estate or a suburban plot, you too, may find the end of the rainbow in your iris bed.

No other flower has so many combinations of color, especially of the delicate and unusual shades, and the name, rainbow flower, is most fitting. They are absolutely hardy, as beautiful in form, texture and coloring as any Orchid, and many are delightfully fragrant. They are not particular as to soil; will grow where anything will, but do better in well drained locations. There is nothing prettier than this Liberty Iris, blooming from May 10th to June 10th. The colors are gorgeous and they completely hid the plant. Be sure and plant some Liberty Iris.

SWEET PEAS

Plant Sweet Peas south of the Ohio River in the fall. Try fall planting and be surprised. Everyone who has a yard ought to grow quantities of this sweetest of all flowers, that is not only a beautiful low-growing vine for garden and decorations but one of the most useful of all in furnishing material for vases, bouquets and all outflower work. Plant quantities of these lovely flowers and cut them with a lavish hand; for every flower you pick, two will come to fill its place. For the largest and finest blossoms dig a trench six inches deep, put in two inches of rotten manure, a little earth, and sow the seed over this three inches apart in the row, covering an inch and a half. Do this during the month of November, or just before freezing weather and as the plants grow, fill up the trench around them with rich earth. Such planting will produce enormous quantities of flowers of the largest size. **Best mixture of Sweet Peas, 5 cents per packet, or 15 cents per ounce.**
